DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "hooks" must be shown or the feature canceled from the claims. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 43 is rejected under 35 U.S.C. 112, first paragraph, because the specification, does not reasonably provide enablement for using the "hooks" (claim 43). The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

Allowable Subject Matter

Claims 38-44 are allowed over the prior art. Claim 38 is allowed because the prior art fails to disclose an anastomosis device deployment system comprising an “expander positioned within the holder and slidable with respect to the holder to a position at which the expander is positioned within the anastomosis device and radially expands the anastomosis device.” Examiner considers that the anastomosis device is being claimed as part of the system.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Torrie (US 5,667,513), Bonutti (US 5,667,520), Hinchliffe et al. (US 5,833,698), Kontos (US 6,132,439), Nicholas et al. (US 5,868,761), Fearnot (US 5,100,423), Blatter et al. (2002/0058955 A1), Grudem et al. (US 2001/0047180 A1), Hendricksen et al.
